

## Outcomes and Performance Measures

(FY2022 Appropriation Act - Public Act 87 of 2021)

**March 1, 2022**

**Sec. 1059.** (1) *The department shall identify specific outcomes and performance measures for state-operated hospitals and centers, including, but not limited to, the following:*

*(a) The average wait time for individuals determined incompetent to stand trial before admission to the center for forensic psychiatry.*

*(b) The average wait time for individuals determined incompetent to stand trial before admission to other state-operated psychiatric facilities.*

*(c) The average number of individuals waiting to receive admission into the center for forensic psychiatry.*

*(d) The average number of individuals waiting to receive admission into the other state-operated hospitals and centers.*

*(e) The average wait time for individuals awaiting admission into the other state-operated hospitals and centers through the civil admissions process.*

*(f) The number of individuals determined not guilty by reason of insanity or incompetent to stand trial by an order of a probate court that have been determined to be ready for discharge to the community, and the average wait time between being determined to be ready for discharge to the community and actual community placement.*

*(g) The number of individuals denied admission into the center for forensic psychiatry.*

*(h) The number of individuals denied admission into the other state-operated hospitals and centers.*

**(2) By March 1 of the current fiscal year, the department shall report to the house and senate appropriations subcommittees on the department budget, the house and senate fiscal agencies, the house and senate policy offices, and the state budget office on the outcomes and performance measures in subsection (1).**

***(a) The average wait time for individuals determined incompetent to stand trial before admission to the center for forensic psychiatry.***

Baselines established by the State Hospital Administration (SHA) and Center for Forensic Psychiatry (CFP) include a goal of a 10% or more decrease in the number of days waited of an incompetent to stand trial (IST) admission.

In calendar year 2020, the average waiting time for persons determined to be IST before admission was 137 days. In 2021, that number was 54 days.

***(b) The average wait time for individuals determined incompetent to stand trial before admission to other state-operated psychiatric facilities.***

Baselines have not been formally established by SHA and CFP for the average wait time of IST patients before admission to other state hospitals. However, to maintain consistency with (a), a goal of 10% or more decrease in the number of days waited would be appropriate.

In 2020, the average waiting time for persons determined to be IST before admission was almost 89 days. In 2021, that number was 52 days.

***(c) The average number of individuals waiting to receive admission into the center for forensic psychiatry.***

Baselines established by SHA and CFP include a goal of a 10% or more decrease in the number of defendants awaiting competency restoration treatment at CFP.

In 2020, the average number of persons waiting to receive admission into the CFP was almost 30. In 2021 that number was 12.

***(d) The average number of individuals waiting to receive admission into the other state-operated hospitals and centers.***

In 2021, the average number of persons waiting to receive services at an adult state-operated hospital per month was 66. The average number of persons waiting to receive services to a children's state operated hospital per month was 51.5.

***(e) The average wait time for individuals awaiting admission into the other state-operated hospitals and centers through the civil admissions process.***

In 2021, the average wait time for individuals awaiting admission into a non-forensic state-operated hospital and center through the civil admissions process was 88 days.

***(f) The number of individuals determined not guilty by reason of insanity or incompetent to stand trial by an order of a probate court that have been determined to be ready for discharge to the community, and the average wait***

***time between being determined to be ready for discharge to the community and actual community placement.***

In 2021 there were a total of 158 not guilty by reason of insanity or IST discharged into community settings. The average number of days waiting for discharge was 115 days.

***(g) The number of individuals denied admission into the center for forensic psychiatry.***

Prospective patients at state hospitals are not denied services; however, patients will not be admitted should they not meet criteria consistent with the Michigan Mental Health Code. Individuals ordered for treatment at CFP may be placed on a waitlist until an appropriate hospital bed becomes available. There are instances when an individual awaiting treatment at CFP are removed from this waitlist. Such instances include, but are not limited to, if the individual has been determined competent to stand trial prior to their admission or their treatment order has expired.

***(h) The number of individuals denied admission into the other state-operated hospitals and centers.***

State hospitals do not deny services; however, patients will not be admitted if their condition does not meet criteria for state inpatient hospitalization consistent with the Michigan Mental Health Code.
